MISSION/VISION

I'm working with diverse technologists around the world to provide open leadership and structure to open source projects empowering others to create amazing things.

PROFILE

- 25+ years of experience helping projects succeed using technology.
- Current focus on distributed teams and open leadership.
- Forward facing technologist, innovator and community builder.
- Embracing modern project management tools for the open web.
- Communicates effectively and optimistically with diverse groups.

ACTIVE PROJECTS

Professional LLCs

Founder & Program Manager at Dark Matter – Distributed team consultancy.
Founder & Program Manager at CodeChops coworking space – Eugene's OG Space.
Founder & Growth Manager at Fanosity – Passion project for audience engagement.

Civic Non-Governmental Orgs

Founder & Program Manager at Open Eugene – A Code for America Brigade
Founder & General Manager at MVP Studio – Edge & Cloud hosing for civic orgs
Founder & General Manager at EugeneTech – Open & Inclusive tech community

NOTEABLE PROJECTS

MVP Studio Edge Compute Cluster

MVP Studio, in cooperation with US-Ignite and Eugene-based Continu datacenter established a "local cloud" to host civic apps and APIs for free. This is huge boon for local county and city agencies to provide open data and civic orgs to avoid hosting fees.

KING-PONG

Lead a diverse group of artists and technologists to build and implement a series of grant-funded interactive art installation events for the Eugene-Springfield community.

Mozilla Gigabit Cities & US Ignite Smart Gigabit Communities

EugeneTech provided leadership and infrastructure for several concurrent grantees of these programs in Eugene, OR. I forged links with other gigabit cities while attending supporting events for Mozilla and US Ignite to build a rich network of civic leadership.
